📍 KanwarKelide

Analyst • Co-founder • AI Product Builder

Summary

Results-driven data and product leader with **5+ years of experience** in analytics, AI research, and end-to-end SaaS development. Proven track record of building scalable analytics platforms and leading high-impact projects for global clients in **healthcare, fintech, and manufacturing**. Adept at leveraging data and AI to drive business outcomes, build **zero-to-one products**, and lead high-performing teams.

Skills

Languages: Python, SQL, JavaScript, Dart

Data Tools: Power BI, Tableau, pandas, scikit-learn, Airflow

Cloud & DevOps: GCP, AWS (EC2), Docker, Firebase, Git

Frameworks: Next.js, Nest.js, MongoDB, Django, Flutter

Professional Experience

Codeclowns

Co-Founder & CTO

Remote

2023–Present

- Leading AI research and engineering for **dwij.io**, an AI-first edtech platform training **custom models** on books and papers for CAT/XAT, SSC/CGL, and CUET.
- Built a full-stack architecture and data pipeline powering learning recommendations for **~1000+ waitlisted users**.
- Delivered the complete tech stack for **ApnaMaali.com**, a gardener-as-a-service platform, from backend to deployment.
- Managing a **cross-functional team of 5**, overseeing product development, devops, and AI integration.

Evalueserve

Senior Analyst

Gurugram, India

2021–Present

- Leading dashboard development for **AstraZeneca** (EUCAN region), improving executive visibility into country-level performance.
- Built end-to-end analytics platforms for **Mastercard**, from ETL to visual dashboards, reducing decision latency by **30%**.
- Delivered a BI ecosystem for **Clarivate** using **SQL**, **Power BI**, and data warehousing tools to monitor operational KPIs.
- Collaborated with stakeholders to define metrics and success criteria for each analytics rollout.

Olectra Greentech Ltd.

Analyst

Hyderabad, India

2019–2021

- Designed analytical systems for **1000+ electric buses** nationwide, enabling **real-time** fleet and battery monitoring.
- Developed a route optimization tool in **Python** that reduced depot energy usage by **15,000 kWh/month**.
- Built a **Django** portal eliminating manual data entry, improving operational efficiency by **40%**.
- Promoted to lead a **team of 3 analysts** directly after graduation.

Projects

Etta.ai (Industry ARC): Developed **scraping** and **NLP pipelines** to extract, clean, and visualize market research data; used **Python**, **Tableau**.

Task Prioritizer: Built a **PHP-based** web app with **MVC** architecture, deployed on **AWS EC2** using **CodeIgniter** framework.

Education

MIT University of Meghalaya

B.Tech in Computer Science

2015–2019

Certifications & Awards

Udacity Deep Learning Nanodegree: Bertelsmann Scholarship recipient; completed capstone projects in CNNs and LSTMs.

IBM Cloud Specialization: 7-course program covering cloud virtualization, backup, and architecture.

IBM Oil & Gas Analytics: Trained in predictive analytics, BI, and big data applications in energy sector.
